## KuoHsin Chen

Department of Surgery, Far-Eastern Memorial Hospital, Taiwan

### Video Workshop 5: Knack and pitfalls for laparoscopic extended cholecystectomy

July 1 (Sat.) 10:30-11:40 [Room 3]

**VWS5-1** Laparoscopic radical resection of advanced gall bladder cancer

### Educational Background

Medical Degree: College of Medicine, National Taiwan University, Taiwan (1986~1993)

Residency: Department of Surgery, National Taiwan University Hospital Taiwan, 1995~2000

Clinical Fellow: Minimally Invasive Surgery Center, Cleveland Clinic Foundation, Cleveland, Ohio, USA 2001

Visiting scholar, Department of HPB and transplantation surgery, Kyoto University, Kyoto, Japan 2007

### Professional Experiences

Dr. Chen serves as the chair of department of surgery and chief of the division of general surgery at Far-Eastern Memorial Hospital, New Taipei City, which is a tertiary refer center with 1150 beds in northern Taiwan.

Dr. Chen's main interests are hepatobiliopancreatic surgery, liver and kidney transplantation, herniology by minimally invasive and open approach. He initiated the first robotic HPB surgery program in Taiwan in 2010 and started the first laparoscopic donor hepatectomy for adult living donor liver transplantation in Taiwan in 2012. With personal experience of more than 1,700 MIS liver, more than 200 MIS pancreatic resection and reports of many Taiwan first procedures, including first laparoscopic PD, right hepatectomy and resection of perihilar cholangiocarcinoma, Dr. Chen is one of the most active MIS HBP surgeons in Taiwan.

In addition to being an active member of many international societies, Dr. Chen is now the Honary President of Taiwan Association of Endoscopic Surgery, Taiwanese Hernial Society and board member of various domestic societies.

**VWS2-1** Two-stage hepatectomy by laparoscopy

#### Current Professional Activities

Since 2014, he has been entrusted to lead the Parisian "Pitié-Salpêtrière-Sorbonne University" center of liver transplantation, which resulted from the merge of three centers, and is a leader of translational research in the INSERM-Sorbonne-ICAN team entitled "Metabolic and biliary fibro-inflammatory diseases of the liver". He became the chair of the digestive, HPB, and liver transplantation department of Pitié Salpêtrière-Sorbonne University in 2023. He holds his Ph.D. degree in oncology, studying hepatocellular carcinoma and the bone marrow (BM) as a tumor cell reservoir. He has conducted many clinical trials (phases II & III) as a PI. He is a national coordinator in the field of transplantation and liver surgery and a member of the scientific council of the French Biomedicine Agency. He is internationally recognized as a pioneer of the laparoscopic approach in liver surgery and living donation.

His team has been more recently involved in ex vivo machine perfusion development, specially dedicated to the defatting process of discarded steatosis livers. This translational project has been funded by several research calls including ANR, AMICAP with AGEPS, and ABM agency. This project also includes a strong partnership with industry.
