JUA2024 primarily employs English for slides, posters, and abstracts.

However, for certain sessions featuring speakers from professionals other than medicine, non-doctor medical professionals, or patients, both slides and abstracts may be presented in Japanese. These sessions are marked with 'JPN' in the program.

Sessions marked with 'ENG' will feature English slides and language, including selected poster discussion sessions.

During the poster session, all posters will be presented in English. As a general guideline, presentations by native Japanese speakers will be delivered in Japanese, while those by others will be in English.

★Reservations are required for these programs, luncheon seminars, and JUA Night (social gathering). Starting on March 13 on the website (need meeting registration). Please check the JUA website and X/twitter for details. Please note that in the event of a large number of applicants, a drawing may be held.

Please enjoy JUA 2024!
